Oracle ERP Testing Capabilities ensuring Health and Integrity – (continued)

Program Management - Go Live: *Paradigm delivers early to requirements reducing cost*

- **PM - Go Live:** *Whether it is Dev, QA or Production environments, Paradigm delivers strong value added program management – coordinate with Business Leads regarding Requirements and Deliverables.*
 - **Release Management** Planning and Coordination mapping multiple business projects to test events with outages and requirements.
 - **Communication Management** Project Matrix employs best practice measurement tools to identify GAPS in process and leveraging technology.
 - **Schedule Management** On Time Every time! Using Agile and PMM methodologies for schedule management.

Defect Management: *Advise Technology Health and Integrity; Solution Defects*

- Defect management: *Critical aspect of the project(s). Clearly communicating the progress and defects in an objective manner while escalating needs to appropriate business owners for resolution.*
 - **Clear and Concise Data** Communication of all aspects of the deliverables to the appropriate business leads.
 - **Defect Tracker** log captured data in defect tracker tool with results and resolutions.
 - **Global Communities** communication using best practice standardized format/matrix.
 - **Entrance Criteria** Qualify usage of instances based on defect risks and mitigations.

Price models – Effective low cost: *Leverage Paradigm’s Rural USA Center to Hybrid Offshore Models*

- **Effective low cost models:** *Typical savings are 30% or more using our USA Rural Center to 50% or more with our Hybrid Offshore Model.*
 - **Rural USA Center** Offers customers the solution to maintaining critical IP domestically here in the USA performed by highly skilled Oracle Supply Chain US citizens in Erie, PA which typically offer savings of 30% or more.
 - **Hybrid** Paradigm also can offer greater savings of 50% or more by combining, non-sensitive data to our testing locations from offshore as well.

“Benefits for you” - Lower cost options utilizing US based and Offshore models.
